

Easby Electronics

Restriction of the use of certain Hazardous Substances (RoHS and RoHS2)

Certificate of Compliance

EC directive 2011/65/EU (the RoHS and RoHS2 Directives) restrict the use of hazardous substances listed below in electrical and electronic equipment.

Easby Electronics designates products and RoHS and RoHS2 compliant based on information provided by our suppliers. RoHS/RoHS2 compliant means that the supplier has confirmed the compliance of the relevant products either because they do not contain any of the restricted substances referred to in Article 4 (1) of the RoHS/RoHS2 Directive at concentrations in excess of those permitted under the RoHS Directive or because removal of the restricted substances is not technically possible and their existence in the products at levels in excess of these concentrations is allowed for the particular applications listed in the Annex to the RoHS/RoHS2 Directive.

For these purposes, the maximum concentration values of the restricted substances by weight in homogenous materials are:

Lead	0.1%
Mercury	0.1%
Hexavalent Chromium	0.1%
Polybrominated Biphenyls	0.1%
Polybrominated Diphenyl Ethers	0.1%
Cadmium	0.1%

Easby are principally suppliers of electronic components, therefore the scope of the legislation and the CE marking system is not a requirement for the products we supply to the majority of our customers. If any of our products is deemed to need CE marking we will work with our suppliers to ensure that they comply.

Currently all our components are indicated as RoHS/RoHS2 compliant or non-compliant. None compliant parts can still be supplied as spare parts. We continually review our compliant parts to ensure that if exemptions apply they are still current.

Easby Electronics has taken all reasonable steps to confirm suppliers' statements regarding the absence of the restricted substances.
