

ENVIRONMENTAL POLICY

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Minimise the consumption of energy, water, land and raw materials in all business activities and encourage the use of renewable resources.
- Actively promote recycling both internally and amongst its customers and suppliers.
- We have a dedicated battery recycling scheme with Ecosurety, to be used both internally and as a service open to our customers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation ie, Reach, RoHs and Conflicts free policies that relate to the Company.
- Annually publish a report demonstrating continuous review and improvement of environmental performance.
